## Hugh Bonner. The Veteran Fire Fighter

fiERE have been great changes in the city of Manila since the era of Spanish occupation. One of the institutions established cleans that have earned popularity is the fire department. Much of in her own sex forget that Susan B. the efficiency which the Manila fire Anthony is eighty-six years old this fighters have attained is due to the February. She was born Feb. 15, 1820. work of that veteran fireman, Hogh A woman writer called her not long Bonner, who was recently appointed ago the "Washington of her sex," which deputy fire commissioner of New York is fitting, only that Washington himcity for the borough of Manhattan. It has been said that Bonner comes near that of the woman leader—overcoming er to being the embodiment of the story book fire fighter than any other living man. He is sixty-six years of age, and when he was a youth fire fighting was not an occupation of itself. Even the city of New York, his birthplace had no paid fire department. Bonner san B. Anthony will be honored and learned the tinsmith's trade as a young revered among those of the world's man, but as a boy he always ran with greatest reformers and martyrs. The the engines when a fire was to be put same woman that names her the Washout, and as som as he was old enough lington of her sex truly says: "Behe joined a volunteer company and cause she in the courage of her convic-rose to be a captain in the volunteer tions stood the ignorally and suffered department. While he was fighting a the scathing critteisms of the world we fire with his company one day he and business women of today are able to his men were notified that they had been made members of the newly or ganized paid department. He continued which cualdes us to enter our offices and for over tea years was chief of the department, raising it to a state of efficiency that made it former. department, raising it to a state of efficiency that made it fumous the president Roosevelt, asking him to be world over. About a half dozen years ago he resigned and was commissioned as he would treat the negroes; no betago be resigned and was commissioned shortly afterward to go to Manila and undertake the establishment of American methods of five lighting in the cap-

ital of the Philippines.
During the 200 years or so that the done ruled in Monita they had not done much toward establishing a fire lepartment. In a city of nearly 300, DO people there were only a few an punted hand engines munned by volunteers. All this lass been changed

HUGH BONNER AND MANUA METHODS RE-FORE HE IMPROVED THEM. the work Bonner did in his stay f from two to three years in the elly. Today the fire department is the pet cans, and many of the officers of men are former United States solrs, a fact which makes for good dis-There are fire houses, steam al elsemical engines and all other apent. The first time that Bouner and ds new service were called on to attement in the Philippine city, so had started in the store of a meron the Escolta, the leading treet. Shopkeepers by the hundred on out into the street, fearing that dr stocks of goods would be cotourn Amid a clanging of strange bells a clatter of hoofs the new firemen made a record in reaching the scene.) hey obeyed their orders like soldlers, he are was put out in less than half in hour, and Manila did not get over to sensution in a week.

time time when Benner was chief of New York fire department a fire roke out on election night on Broadmy. A force of thirty men were on be fourth and lifth floors of the burn-ing building pouring water on the fames when the wall on one side of the structure from the roof to the pave-ment tell outward. There was a which what of time and smoke, and the men at work in the building righting the fire prepared to jump to the ground, thinkfor that otherwise they would be bur-ied in the ruins. The windows were facel with men ready to leap to a fate the inight be death. However is noted club. What is more, a mother, Mrs. his knowledge of the construction like—not a father—is president of this of buildings. He knew that though one wall had fallen out the others would only instance on record of a club mera-

dence to the judgment and were under mer outing such good disclothes that they obeyed, in the city.

# Feminine Snapshots

### Let Us Have Susan B. Anthony Birthday Dinners and Celebrations.

Let no woman who loves and believes savage and so called civilized. I know fer, no worse. If the president ever answered that letter of the ploneer fighter for her sex the answer has not been made public. In a speech not long ago Susan eloquently advocated the earning of money by married wothee, "Why should not a woman work?" she asks, "Why, if she is earning a good salary, should she surrender it, even when she marries, when It will help keep a home?" Let us have ven in her lifetime birthday banquetz for Susan B. Anthony Let there be

music and flowers and brave speeches. The other day I asked a dentist which endured pain better, men or wo men, and he answered immediately "Oh, women, by all means." So there we have the unprejudiced testimony of one that knows, for the feminine perand incisors ground and pounded at by a dentist without making man. thout it is certainly "superman," as Bernard Shaw's play has it,

Miss Esther A. Howland of Worces-ter, Mass., was the first person in this country to manufacture valentines. Be fore she began, in 1849, all these mis sives were imported. Miss Howland was a graduate of Mount Holyoke semmary, and after she left school she took clasors, paste pot, colored pictures and aper and began at first to make imitations of the valentines which her father, a stationer, imported. She sent some samples of her work to Baston and New York. They were sold imme and New York. They were sold immediately, and a large number of others was ordered. That was the beginning of her trade, and from that time on till she died, some months ago, she had all the died, some months ugo, she had althe orders she could fill. She became very well to do.

In Rudyard Kipling's "Kim" he Kim's question whether the old woman of Kulu would ever learn any sense "My sen, she has millions of lives be fore ber; she will learn a little in each." We may hope this will also prove true f preperty owners, who no longer of these women who carry about with each in blank despair the burning of them hand bags containing valuable gens or large sums of money and elhere are over 150 paid men in the de- ther forget the satchels and leave them somewhere or else have some burly e are natives, but the officers are thief wrench them from the frail woman wrist and fingers. But women have been doing this fool thing a long time now-so long that it seems as if they would need more incurnations than even the oid woman of Kulu.

Notice this, from Carroll D. Wright, and think over it: "The capacity to take advantage of an opportunity is the capacity that is needed and not the op-portunity to live without capacity."

Luther Burbank, the famous pomol egist, says that the American is to be the finest human product on this globe. Well, maybe, but American men will have to cease saturating themselves with tobacco polson and drenching themselves with alcohol poison before that can be.

Take notice that the recent victory of Joseph Chamberlain in getting himself elected to parliament in the face of a tide of opposition against his party i largely attributed in England to the work of his brainy and tactful American wife. But it's queer, isn't it, that while a woman has brains enough to secure the election of her husband to high political office she has not sense enough to vote on her own account?

. . Wayland, Mass., ten miles out of Bos ton, is the only place, I believe, in the world that has a Fathers and Mothers unique club, inaking it probably the robubly stand. So he shouted to the bership of both sexes having a woman at the head of the organization. The Stay where you are. You'ce all club was started for philanthropic pur-ght." The men and so much confi- poses, particularly that of giving summer outings to the children of poverty

ELIZA ARCHARD CONNER.
